DETAILED ACTION

Election/Restriction

Species Restriction is required under 35 U.S.C. 121 and 372.

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PTC Rule 13.1

Species Restriction.

1) **c-myc-, c-ras-, hern-, sst1 or sst2-mRNA.** Applicant is required to choose one specifically named **mRNA** as recited in claim 7.

The species are independent or distinct because each **mRNA** comprises distinct structures resulting in different functional properties and thus different results in hybridization of mRNAs by the peptide nucleic acid of the invention.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, at least claim 1-3 are generic.

2) **Gd, Fe or F.** Applicant is required to choose one specifically named **diagnostic conjugate** as recited in claim 9.

The species are independent or distinct because each spacer comprises distinct structures resulting in different functional properties.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, at least claims 1-3 are generic.

Art Unit: 1633

3) **polylysine, polyglycine.** Applicant is required to choose one specifically named **spacer I and spacer II** as recited in claim 12.

The species are independent or distinct because each spacer comprises distinct structures resulting in different functional properties.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, at least claims 1-3 are generic.

In view of the distinction of species as set forth in the above paragraphs, it would be unduly burdensome for the examiner to search and examine more than one of the elected patentable distinct species of species listed above.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
